Andrew's Angle

"Happy (early) Thanksgiving! Our team here at MAM is very thankful for all our valued members and partners that support our mission of promoting, preserving and advancing manufacturing in our state. Enjoy the holiday this week. I encourage everyone to reflect on all that they're thankful for this year. Oh, and make sure to eat lots of turkey!"

-Andrew

James River Manufacturing

Extend the life & value of your investments! At James River Manufacturing we combine experienced refurbishing techs with the newest technology to bring your tanks and heavy equipment back to life.

Why buy new, when you can have us Re-new? At James River Manufacturing, we understand tanks are a huge asset to your company. Refurbishing your tanks to ensure a lifetime of use is critical to the bottom line. As a dedicated propane facility, we purge, sandblast, primer, paint, and re-valve propane tanks. James River Manufacturing uses only top-quality parts, primer, and paint.

Strapped for cash flow? We Buy Tanks. James River Manufacturing buys used propane tanks! We pay cash, trade-in, or swap.

Green LP

Green LP Service is a quality service you can count on. Green-LP offers a range of quality propane services. Our brand new, state-of-the-art facility includes an 8,000 square foot sandblast department and paint facility with a 65-foot paint booth. The 16,000 square foot manufacturing and repair facility allows us to build and service the best possible equipment for your propane company.

Green-LP fills a void in the Mid-West for propane marketers. Creating a centralized location for service, assembly, and building for a variety of propane products. Our team of qualified staff ensures our customers have the best available service and satisfaction when it comes to your business. If it's propane, we can do it.

Manufacturing News

Kemin breaks ground on new Missouri manufacturing site

VERONA, MO. - Ingredient manufacturer Kemin Industries broke ground on a new production plant for clean-label protein ingredients for meat, poultry and protein-based applications. The planned 38,000-square-foot production plant is scheduled to open in March 2023. It represents a \$40 million investment for Kemin Food Technologies - Americas to manufacture its Proteus portfolio of patented, clean-label protein ingredients.
