Software Development for Manufacturing Companies

At Stronghold Data, we offer various services to perfect your manufacturing processes:

Automation Apps

Our software development for manufacturing industry companies can improve the efficiency of your processes with workflow automation.

Workforce Management

Our software solutions will help perfect project management processes to increase productivity.
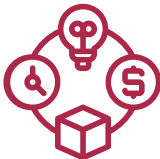

ERP Software Development

We provide ERP solutions for any manufacturers, from Make-to-Stock (MTS) and Make-to-Order (MTO) to Configure-to-Order (CTO).

Maintenance and Support

We offer maintenance and support services around the clock with regular cybersecurity audits and optimization analysis.

Manufactuing Resource Planning (MRP)

We'll develop software specific to your business needs, including tracking changes, delivery times, predicting orders, due dates, and everything else throughout the product life cycle.

Content Management System (CMS)

We develop tailored content management systems to address your specific needs. Our highly customizable, scalable, and secure solutions support your everyday and future business goals.

Manufacturing Execution Systems

We provide robust manufacturing execution software to gather accurate real-time data at every stage of the product life cycle.

Efficient Inventory Management

Your manufacturing company can easily track and manage your inventory with better flexibility and customized software.

Logistic Management

Our software solutions provide effective logistics management platforms that offer transparency in your logistics and procurement processes.

Quality Assurance

We deliver high-quality manufacturing software and applications with rigorous quality assurance and testing processes.
