Washington University

C.R. England, Inc

### COVID-19 and the Job Market

During the quarter of July to September, Missouri's economy has been recovering from the early effects of the COVID-19 pandemic. Not all businesses have been able to return to pre-COVID employment levels, particularly in the leisure and hospitality sector. However, there is evidence of hiring in a variety of other sectors, including in health care and some retail occupations. During the on-going recovery from the pandemic, economists and researchers will need to work to monitor and assess the long-term impact COVID-19 will have on the economy and job market in Missouri and the U.S.
