Profile ID: 2186

Ozarks Coca-Cola Bottling Company is a third generation, family-owned bottler in Missouri. In March of 1920, Edwin C. Rice, Sr. and his family moved from Kentucky to Springfield to purchase the Electric Bottling Company. Electric's principal product line was seltzer and Farmer Beverages, a soft drink line that included Orange, Grape, Root Beer, Lemon, Peach, Ginger Ale and Strawberry flavors. Coca-Cola was just a small portion of the Rice's business at this time. The Rice family is one of the original bottlers that entered an agreement for the right to hold Coca-Cola franchise in perpetuity. Always a family-owned business, Mr. Rice, Sr. and his brothers operated the business and in 1939, Mr. Edward E. Heer came on board as sales manager. Mr. Heer was married to Virginia "Tookie" Rice-Heer until his death in 1985. Tookie then assumed the vice presidency of the company, which was later renamed Ozarks Coca-Cola/Dr Pepper Bottling Company. In 1953, Edwin C. "Cookie" Rice joined the family business and currently serves as CEO and Chairman of the Board. Cookie, his daughters and his nieces share ownership of Ozarks Coca-Cola/Dr Pepper. Under their leadership and direction, the company now employs approximately 500 people, provides production, warehouse services and delivery and equipment services, manufactures products in Springfield and operates sales centers in Springfield, Bolivar and Rolla. Ozarks Coca-Cola was a Top 10 Bottler in 2014, and in October of 2015, Ozarks Coca-Cola expanded its franchise territory with the acquisition of new territories from The Coca-Cola Company. A complete market area map is available. The Rice and Heer families, along with their dedicated employees, are dedicated to sharing the distinct Ozarks Coca-Cola brand of customer service and strengthen the communities they serve.

Red Crow Marketing is a full service advertising and marketing firm in Springfield. Our specialization is marketing accountability. We start with good research to develop a plan to reach specific objectives for our clients. We then recommend/produce the marketing and advertising tools to reach those objectives, such as highly engaging websites that easily incorporate online marketing like SEO, SEM and social media. We also provide production for graphic design, direct mail, audio/video for TV/online/training videos and jingles. Our media placement services increase audience reach and results while reducing expense for both broadcast and print media. Regular analysis and assesment of our efforts are provided to our clients in transparent reports which identify where we are succeeding and where we need to improve. We provide full marketing management to produce the best possible solutions to increase your business.

Aire Master Manufacturing is a private label and contract packaging FDA inspected manufacturing company established in 1958. We are a member of Clean Gredients. We manufacture liquids, personal care items, shampoos/conditioners, liquid hand soaps, body washes, sanitizers and odor control. We manufacture liquid fill product in various types of container with numerous types of label. We are a private label manufacturing company. Through distributors currently we manufacture and provide products for Bed, Bath and Beyond, Wal-Mart, Dick's Sporting Goods, Bass Pro, Cabalas and Target stores, as well as a few others chain stores. Whatever need you may have in any category we are glad to provide samples and pricing with no obligation or cost. We offer expert product knowledge for custom formulations on various product lines to businesses like yours. We can offer you the right experience to ensure that your products look and work the best in the specific market you are trying to reach. If you are looking to formulate a new product, or match an existing one, we will do the work for you. We pride ourselves on our responsiveness to our customers. Whether it's 1,000 to 10,000 bottles for market testing, or millions for retail distribution, we are ready to meet your specific needs. We can provide you a myriad of packaging services ranging from the very simple to the complex. We were established in 1958 and our facility is FDA registered. Our quality and inventory control operate at the standards you specify when you enlist our services. We work closely with each individual customer to ensure that new products and labeling meet all design criteria. Our in-house design team offers you innovative thinking on packaging ideas, whether it be a new product or an existing one. Aire-Master's team will devote themselves to finding lower cost methods of production, packaging and distribution. We will work with you to develop the best product within your customer's budget, or the buyer's price bracket. Let Aire-Master be an extension of your company by allowing us to provide the labor, equipment, location, and knowledge to create or assemble the very best product for you.

Griffin Industries is a production job shop specializing in metal stamping and forming. We have over 25 dedicated presses ranging from 12 ton to 250 ton capacity and provide single operation or multistage process. Our experts can help you by providing complete turn-key service from assisting with design or creating samples and prototypes, to delivering your completed product. We also provide complete die maintenance in house. Our capabilities allow us to complete your stamping and forming needs competitively and on time.

Quality Precision Machining Company, over 24 years in business providing: CNC MILLING CED has two horizontal machining centers: a Mazak HCN-5000 and a Mazak PFH-4800 along with one Mazak V414-32 machining center. Both horizontal machining centers include four-sided tombstones and are fourth axis CNC's. All milling centers are equipped with touch probes which allow for accuracy, consistency and faster set-up even on odd shaped castings and flame-cut parts. The through tool coolant aides in longer tool life reducing overall cost. CNC TURNING For turning needs CED is equipped with a Mazak QTN-200 MSY multi-spindle center with a y-axis and a Mazak 250 MSY-II 20" multi-spindle center with y-axis. This machine, coupled with an automatic bar feeder, allows "lights out" operations. The live tooling turning center eliminates the need for multiple set-ups decreasing overall cost and set-up time. A Mazak Quick Turn 8 turning center is in house for smaller turning operations. CUSTOM WATERJET Waterjet capabilities at CED include a Flow Mach 4 Integrated Dynamic XD Waterjet System. This 5 axis machine includes a dynamic head for advanced beveling and 3D capabilities allowing the ultimate in accuracy, speed and flexibility. Parts can come out of this machine with no secondary operations needed. The waterjet can cut any material and the dynamic head automatically compensates for the natural taper to ensure a straight edge throughout the thickness of the cut. SECONDARY OPERATIONS CED is also equipped with an Amada HA250W automatic production band saw, manual mills/lathes, a glass bead blaster and 2 vibratory debur machines. In-house equipment keeps our prices competitive and allows for timely delivery. Operations such as plating, heat treating and anodizing will be handled by qualified sources.

Natures Renewable Products is a division of AC Component Specialists, Inc. Natures Renewable Products manufactures the A-Maize-Ing Heat biomass (shelled corn/wood pellets) forced air furnace. The furnace offers an adjustable input of 80,000 to 150,000 BTUs. The thermostat controls the feed system to provide a constant temperature. The fuel hopper holds 14 bushels of fuel which can last up to 10 days before needing refilled. There is also an optional 200 lbs. capacity hopper that attaches to the furnace. The furnace is UL listed. Save up to 40% on your business, home, shop, greenhouse or warehouses heating bill!

AC Component Specialists (ACCS) is the North American distributor sales and service center; remanufacturer and aftermarket support of the HITACHI refrigeration screw compressors. ACCS offers new and remanufactured compressors. ACCS also stocks a complete inventory of genuine HITACHI replacement parts at our facility in Marchfield MO. ACCS has a new division called Nature's Renewable Products. We are now manufacturing the A-Maize-ing Heat biomass furnace at our facility in Marshfield. This furnace can burn corn, wood pellets and most other pelletized fuels. This furnace compared to fossil fuels will greatly reduce your cost to heat your home, shop, greenhouse or business.

Global Recovery Corp was founded in 2013 and is located in Springfield, MO. We are an engine and part supplier for the agricultural, on highway trucking, industrial and automotive sectors. GRC works with original equipment manufacturers to help maximize their return on aging and obsolete part and core inventories. This means original equipment from John Deere, CNH, AGCO, Caterpillar, Cummins, Detroit, International, Volvo, Iveco, Yanmar and others at very low prices! We stock thousands of new, used, rebuilt and aftermarket parts, engines, transmissions and power units. Leveraging our relationships with manufactures, dealership groups, and spare part dealers; GRC is able to offer the lowest prices and best customer service in the industry. GRC is also a premier core buyer and supplier for many world class OEMs and remanufacturing facilities. We have an intricate core network spanning the US and can procure all your core needs. GRC's team of professional core buyers is able to source your core needs at reasonable prices; saving time and allowing businesses to focus their resources on producing first class products. Finally, GRC provides scrapping solutions and value added services to OEMs and manufactures such as consolidation, teardown and export.

Roderick Arms & Tool Corp provides a full range of manufacturing capability ranging from CNC turning and milling, OD and ID grinding, surface grinding, gun drilling, tapping, threading, stamping, punching, tool and die design and manufacturing. We have a CAM system for part programming and a coordinate measuring machine for inspection. We also can provide SPC/SQC charts if requested. We machine a variety of materials a few of which are aluminum and steel castings, Inconel 605, 6AL-4V Titanium, brass, NI-Resist and alloy steel bar. Our skilled machinists are involved in manufacturing, tool and die design and production, and contract machining of precision parts.

In December 2003, TOTH was established and initially specialized in electric utility engineering. Since that time, we have grown to become a multidisciplinary firm that features electrical, civil, & structural engineers, as well as land surveyors, CPAs, grant writers, and other professional staff working together to serve a wide range of clients. These clients include municipalities, architects, educational institutions, and public & private utilities across the country. TOTH is committed to providing high-caliber, professional expertise grounded in past experience and shared knowledge supported by skilled staff and innovation. Our staff of nearly 100 individuals includes professional engineers, engineering interns, CPAs, GIS specialists, and professional land surveyors. Across all of the market segments we serve, project owners are seeking well-qualified engineering firms with strong momentum, open communication, and careful attention to the priorities of their clients. At TOTH, we understand the need, and we are eager to be a part of the solution.
